PROFESSIONAL SUMMARY

Third-year BSc. Economics student at Jomo Kenyatta University of Agriculture and Technology (JKUAT) and Software Engineering graduate at ALX Africa, combining rigorous training in economic analysis with hands-on software development expertise in Python, Django/Django REST Framework, and JavaScript/React. Seeking opportunities to apply data-driven thinking and software engineering in support of evidence-based decision-making, program evaluation, and operational efficiency.

EDUCATION

Bachelor of Science in Economics *Expected: April 2027*
Jomo Kenyatta University of Agriculture and Technology (JKUAT) — Juja, Kiambu

Relevant Coursework:

- International Economics | Monetary Economics | Health Economics | Welfare Economics
- Macroeconomic Theory | Economics of Industry | Mathematics for Economists

Software Engineering *2026*
ALX Africa

Relevant Coursework:

- Backend web development | Django | Python | PostgreSQL | Version Control | REST API
- Frontend web Development | JavaScript | React | Docker

TECHNICAL SKILLS

Software Development

- Backend: Python, Django, Django REST Framework (DRF)
- APIs: REST API design, JWT authentication/authorization, OpenAPI/Swagger documentation (drf-spectacular)
- Background Jobs: Celery (task queues), Redis (broker/cache)
- Databases: PostgreSQL, Django ORM
- DevOps & Deployment: Docker, Docker Compose, environment-based configuration (.env files)
- Version Control: Git, GitHub

Data & Economic Analysis

- Regression analysis, time-series modelling, hypothesis testing
- Cost-benefit analysis, market structure analysis, policy/program evaluation
- Tools: Microsoft Excel (PivotTables, VLOOKUP, Charts), R (analysis & visualization), Stata

Productivity & Collaboration

- Microsoft Office Suite (Excel, Word, PowerPoint) | Google Workspace
- AI-assisted research & workflow optimization (ChatGPT, Claude, Gemini)

SOFTWARE PROJECTS

Finance Alert / Notifier System (Django) — github.com/Nebula0999/notifier

- Built a Django-based notification system that fetches financial data from Google Sheets and dispatches automated email alerts.
- Implemented full authentication flows: registration with email verification, password reset, and login via email or username using a custom authentication backend.
- Integrated Google Sheets API (service account) for data ingestion; added a secure server-side image proxy to resolve CORS and external image-loading constraints.
- Configured environment-variable-based settings and produced comprehensive deployment guides and checklists.

ALX Project Nexus — Django REST API Backend — github.com/Nebula0999/alx-project-nexus

- Developed a modular e-commerce/educational platform backend using Django 5 and DRF with JWT authentication and email verification.
- Implemented production-grade API features: filtering, search, ordering, pagination, scoped throttling, and Redis caching for high-read endpoints.
- Incorporated background processing with Celery and Redis, including retry strategies and a developer-friendly eager mode for local development.
- Authored architecture documentation and endpoint references; containerised the environment using Docker and Docker Compose.

React Portfolio (React + Vite) — github.com/Nebula0999/react-portfolio

- Built a modern frontend portfolio using React with Vite tooling, implementing a clean project structure and linting configuration.

TRAINING & CERTIFICATIONS

AI Career Essentials *2024*

ALX Africa

- Practical skills in prompt engineering, AI-assisted research, and productivity workflows to enhance output quality and efficiency.

Professional Foundations *2025*

ALX Africa

- Training in agile project management, professional communication, collaborative teamwork in technical environments, and workplace readiness.

EXTRACURRICULAR ACTIVITIES & COMMUNITY INVOLVEMENT

Member — Tech & Innovation Communities *2023 – Present*

- Participated in workshops and seminars on AI, cloud computing, and digital transformation through ALX Africa, ONEDEV, and the Power Learn Project.
- Networked with professionals and peers across technology and economics, broadening exposure relevant to Kenya's evolving digital economy.

AREAS OF INTEREST

- Software development for data-intensive and evidence-based decision-making systems
- Economic data analysis, data engineering, and automation for reporting and programme monitoring
- Financial modelling and investment analysis in Kenyan and East African markets
- Environmental sustainability, climate finance, and green economy policy

– Public policy research and socioeconomic development in Kenya and Sub-Saharan Africa
